Exam : **1Z0-419**

Title : Oracle Application
Development Framework
12c Essentials

Version : DEMO

1.Which three statements are true about using a dvt;map component on a page? (Choose three.)

A. You need to define a connection to a server that provides map images.

B. You can use an exact street address to show a point theme.

C. There is no way to display the distance between two points on a map.

D. You can modify the icon used to represent a point on a map.

Answer: A

2.Your organization has specified that menu components should be located on the left-hand side of a page and that the main content should be displayed in the center. How do you ensure that developers adhere to this standard? (Choose the best answer.)

A. Ask all developers to use the two-column quick start layout.

B. Create a page template that defines the specified layout and distribute it to developers

C. Create an ADF library that contains a collection of ADF Faces components that developers must use

D. Create a task flow template that defines the specified layout; this will enforce the correct layout on all pages that are built from the template.

Answer: B

3.Which two occur when a bounded task flow is created as a region on a page? (Choose two.)

A. The transaction property of the task flow is set to "Use Existing Transaction if Possible."

B. Any views defined as pages on the bounded task flow are changed to page fragments.

C. An af:reqion tag is added to the page.

D. The refresh property of the task flow binding is set to ifNeeded.

E. a task flow binding is added to the page definition for the page.

Answer: C,E

4.Which three statements are true about declarative features of view objects? (Choose three.)

A. You can use view object bind variables to parameterize a view object where clause with values supplied at run time.

B. By default, a view object instance retrieves all database rows into the view object cache.

C. To implement master-detail behavior between two view object instances, you define an association between those instances.

D. a view accessor defines a validation expression that you apply to a view object attribute.

E. A view object can include attnbutes whose values are based on SQL expressions rather than mapping directly to a database columr

F. A view object definition can include many view criteria but you can choose which view criteria to apply for each view object instance.

Answer: A,C,E

5.You are prototyping an ADF application that uses ADF Business Components. However, the database schema that you can connect to does not contain any tabl Which two declarative options are available to you to provide hard-coded data for the purposes of your prototype? (Choose two.)

A. entity objects with default values

B. placeholder data control

C. stati c li st vi ew objects

D. declarative managed beans

Answer: B,C
