Exam : **200-310**

Title : Designing for Cisco
Internetwork Solutions

Version : DEMO

1.While designing a remote access VPN, a customer has requested three different levels of access to be granted for administrators, employees, and partners.

Which three access policies must be configured for the three groups? (Choose three)

- A. Employees are centrally authenticated with limited network access controlled with ACLs
- B. Administrative users are centrally authenticated with full access to the internal infrastructure
- C. Employees are centrally authenticated with full access to the internal infrastructure
- D. Administrative users have local credentials with full access to the internal infrastructure
- E. Partners are centrally authenticated with limited network access controlled with ACLs
- F. Partners are centrally authenticated with full access to the internal infrastructure

Answer: ADE

2.An engineer is designing a new modular network topology.

Which option is an advantage to using a hierarchical design?

- A. It provides additional fault tolerance
- B. It manually controls failover.
- C. It enables the network to scale
- D. It supports unequal cost paths

Answer: C

3.What are two industry drivers that promote network virtualization? (Choose two)

- A. traffic isolation
- B. device reduction
- C. multi-vendor support
- D. application stability
- E. reduced complexity

Answer: AE

4.A startup company wants to deploy the Cisco IP Telephony solution.

Which two actions are appropriate design approaches? (Choose two)

- A. Connect IP phones to the Ethernet switches of data center module
- B. Connect Cisco Unified Communications Manager to the Ethernet switches of data center module
- C. Connect Cisco Unified Communications Manager to the Ethernet switches of the campus core layer
- D. Connect user IP phones to the Ethernet switches of access layer.
- E. Connect SIP trunks for PSTN connectivity to Ethernet switches of campus core layer

Answer: CD

5.What virtualization technology is used to provide device virtualization on the Cisco Nexus 7000 series switch?

- A. VDC
- B. VPC
- C. VSS
- D. VRF

Answer: A
