Exam : **400-251**

Title : CCIE Security Written Exam
(v5.0)

Version : DEMO

1.Which statement is true regarding securing connection using MACsec?

- A. It secures connection between two supplicant clients
- B. Switch uses session keys to calculate decrypted packet ICV value for the frame integrity check
- C. Switch configured for MACSec can only accept MACSec frames from the MACSec client
- D. It is implemented after a successful MAB authentication of supplicant
- E. It provides network layer encryption on a wireless network
- F. ISAKMP protocol is used to manage MACSec encryption keys

Answer: B

2.Which statement is correct regarding password encryption and integrity on a cisco IOS device?

- A. With “enable secret” missing in the configuration the console session cannot get privilege access using console password due to missing encryption
- B. The “enable password” is preferred over “enable secret” as it uses a stronger encryption algorithm
- C. The “service password-encryption” global command encrypts all the passwords except the CHAP secret
- D. The “username<name> secret<password>” command encrypts the password with SHA-256 hashing
- E. The “enable secret” uses MD5 for the password hashing
- F. The “service password-encryption” global command performs both encryption and hashing of all the passwords

Answer: E

3.If multiple contexts share an ingress interface which would be the criteria used by ASA for packet classification?

- A. Destination IP address
- B. ASA ingress interface IP address
- C. ASA ingress interface unique MAC address
- D. ASA NAT configuration
- E. Policy based routing on ASA
- F. ASA egress interface IP address
- G. Destination MAC address

Answer: C

4.Which statement is true about Dual-Hub DMVPN implementation where each spoke has two connections, one to each hub via different ISPs

- A. It uses multipoint GRE tunnel
- B. It does not allow tunnel protection using IPsec
- C. It does not allow NHRP authentication
- D. It uses two tunnel interface on each hub to terminate connection from each spoke
- E. It uses a single tunnel interface on a spoke to connect two different hubs
- F. It uses point-to-point GRE tunnel

Answer: A

5.What is the best description of a docker file?

- A. Text document used to build an image

- B. Message Daemon files
- C. Software used to manage containers
- D. Repository for docker images

Answer: A
