**Exam** : **CCSP**

**Title** : Certified Cloud Security  
Professional (CCSP)

**Version** : DEMO

1.Which of the following roles is responsible for creating cloud components and the testing and validation of services?

- A. Cloud auditor
- B. Inter-cloud provider
- C. Cloud service broker
- D. Cloud service developer

**Answer: D**

**Explanation:**

The cloud service developer is responsible for developing and creating cloud components and services, as well as for testing and validating services.

2.What is the best source for information about securing a physical asset's BIOS?

- A. Security policies
- B. Manual pages
- C. Vendor documentation
- D. Regulations

**Answer: C**

**Explanation:**

Vendor documentation from the manufacturer of the physical hardware is the best source of best practices for securing the BIOS.

3.Which of the following is not a component of contractual PII?

- A. Scope of processing
- B. Value of data
- C. Location of data
- D. Use of subcontractors

**Answer: C**

**Explanation:**

The value of data itself has nothing to do with it being considered a part of contractual

4.Which of the following concepts refers to a cloud customer paying only for the resources and offerings they use within a cloud environment, and only for the duration that they are consuming them?

- A. Consumable service
- B. Measured service
- C. Billable service
- D. Metered service

**Answer: B**

**Explanation:**

Measured service is where cloud services are delivered and billed in a metered way, where the cloud customer only pays for those that they actually use, and for the duration of time that they use them.

5.Which of the following roles involves testing, monitoring, and securing cloud services for an organization?

- A. Cloud service integrator

- B. Cloud service business manager
- C. Cloud service user
- D. Cloud service administrator

**Answer:** D

**Explanation:**

The cloud service administrator is responsible for testing cloud services, monitoring services, administering security for services, providing usage reports on cloud services, and addressing problem reports
