Exam : **DES-1D11**

Title : Specialist: Technology
Architect - Midrange Storage
Solutions

Version : DEMO

1. In a Dell EMC Unity environment, how many Disk Partnership Groups will be created using all the disks shown in the exhibit?

- A. 1
- B. 2
- C. 3
- D. 5

Answer: B

2. You are designing a Dell EMC Unity solution for a customer. The customer requires protection against the loss of a site for an application that is sensitive to long response times.

Which Unity feature meets these requirements?

- A. Incremental Attach
- B. Asynchronous Replication
- C. Native SANCopy Import
- D. Synchronous Replication

Answer: B

3. A customer has a Dell EMC SC9000 that supports transparent, non-disruptive volume movement among arrays. This allows the combined capacity and cache of the entire federated cluster to be seamlessly utilized for maximum performance and scalability in expanding data centers.

By leveraging the eight SC9000 arrays, what will be the total maximum raw capacity?

- A. 5.3 PB
- B. 8 PB
- C. 16 PB
- D. 24 PB

Answer: D

4. You are designing a Dell EMC Unity solution that uses external key management to provide data security to an array at a remote site.

Which encryption key is held in the KMIP server and is required for the Unity boot?

- A. Key Wrapping Key
- B. Store Ignition Key
- C. RSA Key
- D. Data Encryption Key

Answer: B

5. Which value should be used for back-end sizing when planning a Dell EMC SC Series solution?

- A. 1x front-end throughput

- B. 2x front-end throughput
- C. 3x front-end throughput
- D. 4x front-end throughput

Answer: B
